DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-19, drawn to method of playing a pari-mutuel wagering game ,
affording a plurality of game participants an opportunity to place a wager on one
or more of the plurality of potential outcomes and to specify an odds level of a
plurality of progressive odds levels at which the wager is accepted; classified in
class 463, subclass 028.
 - II. Claims 20-26, drawn to method of playing a pari-mutuel wagering game ,
setting an initial share price for each of the plurality of potential outcomes;
affording a plurality of game participants an opportunity to purchase at least one
share in favor of at least one outcome of the plurality of potential outcomes at the
initial share price; determining an adjusted share price for each of the plurality of
potential outcomes; affording the plurality of game participants an opportunity to
purchase at least one share in favor of the at least one outcome of the plurality of
potential outcomes at the adjusted share price; classified in class 705, subclass
35.
2. The inventions are distinct, each from the other because of the following reasons:
Inventions I and II are related as subcombinations disclosed as usable together
in a single combination. The subcombinations are distinct if they do not overlap
in scope and are not obvious variants, and if it is shown that at least one

Art Unit: 3696

subcombination are separately usable. In the instant case, subcombination (II) has separate utility such as setting an initial share price for each of the plurality of potential outcomes;

affording a plurality of game participants an opportunity to purchase at least one share in favor of at least one outcome of the plurality of potential outcomes at the initial share price; determining an adjusted share price for each of the plurality of potential outcomes; affording the plurality of game participants an opportunity to purchase at least one share in favor of the at least one outcome of the plurality of potential outcomes at the adjusted share price; See MPEP § 806.05(d).

The examiner has required restriction between subcombinations usable together. Where applicant elects a subcombination and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
